UI/UX Developer

Description

We're looking for a UI/UX developer who will take a key role on our team. Our UX developer will be responsible for conducting user research, creating wireframes and designs, and ultimately aligning user behavior to actions that drive results.

You'll be working alongside other engineers, developers, and marketers collaborating and iterating on the user experience of our {{platform/application/etc.}}.

Responsibilities

UI-UX Designer job description should contain the following duties and responsibilities:

- plan and implement new designs
- Optimize existing user interface designs
- Test for intuitivity and experience
- Communicate with clients to understand their business goals and objectives
- Develop technical and business requirements and always strive to deliver intuitive and user-centered solutions
- Combine creativity with an awareness of the design elements
- Create prototypes for new product ideas
- Test new ideas before implementing
- Conduct an ongoing user research
